Description Summary

Our Small Business Loan Database features a curated and highly responsive list of businesses that have recently secured funding through various commercial loan programs. These companies are actively deploying capital toward equipment purchases, inventory expansion, technology upgrades, facility improvements, and other operational needs. Spanning multiple industries, these are growth-oriented businesses in a critical phase of development, making them ideal targets for lenders, financial solution providers, commercial vendors, and B2B marketers. Whether youâ€™re offering merchant services, business insurance, equipment leasing, or financial planning tools, this file connects you with decision-makers managing real capital and ready to invest.

How Our Data is Compiled

This database is compiled through a combination of self-reported financial surveys, public business filings, loan program data, and aggregated commercial transaction records. We source verified insights from small business owners who have indicated participation in financing programs, ranging from SBA-backed loans to private business lines of credit. The data is further enhanced with firmographic details including industry, company size, years in business, and loan purpose where available. All records are CASS certified for postal accuracy and processed through the National Change of Address (NCOA) system to ensure up-to-date deliverability. The result is a reliable and actionable list of businesses that are funded, focused, and financially active.

Consider the Facts

- Nearly 60% of small business owners say managing cash flow is one of their biggest challenges.
