Description Summary

Before you can build a relationship with your client, you must find them. The AmeriList National Business Database makes it easy to connect with B2B prospects. Our nationwide listing of current active businesses, gives you the ability to reach over 20 million public and private businesses. As the leading provider of targeted Business Mailing Lists, we have helped thousands of B2B marketers find more responsive prospects. Since 2002, AmeriList has been the go-to-source for the most accurate and cost effective Business Sales Leads, Mailing Lists and Telemarketing Lists. By combining a multitude of public and proprietary data sources, we have brought to the market a database of over 20 million businesses rich in demographic and firmographic selections. How is our business database different? Call an agent today and they will be happy to answer that question!

How Our Data is Compiled

Our multi-sourced national business database is compiled by combining a wide range of sources which enables us to deliver an industry leading B2B Marketing solution. The information within our B2B list is collocated from multiple public and private sources including Yellow Pages, Government Data, White Pages, SEC Filings, Annual Reports, Business Magazines and Industry Newspapers. Not only do we cross reference a multitude of sources, we ensure the most accurate data and also telephone verify each business multiple times annually. This enables us to keep our records up-to-date. In addition, we also secure data via a strategic partnership from several tier one business data compilers. These files are then merged and purged to create a robust and accurate national file. Through our multisource compilation method and our continuous verification process, we are able to identify more unique business information, yield more contacts names, and provide our clients with a more reliable and deliverable business database, than any other single compiler in the industry.
