Description Summary

This target direct marketing list includes those who suffer from Stress and various Hormone Disorders, and require medication to control symptoms of high blood pressure and hormone imbalances. These disorders can affect the how the brain functions, as well as the rest of the body. Unfortunately, many of these consumers are perpetual buyers of medication and health services. Due to the ongoing treatment, targeting these individuals presents a significant value to companies who can help them deal with the effects of their disorders using Stress, Hormone, and Wellness mailing lists.

How Our Data Is Compiled

Our Stress, Hormone, and Health Database is derived from a multitude of public and proprietary feeds both online and offline including: surveys, self-reported individuals, and previous memberships/ purchase history. When you use our data, you are guaranteed accuracy and deliverability. Our compilation team processes the entire database against the National Change of Address (NCOA) file monthly. The list is also CASS certified to ensure further accuracy.

Consider The Facts

- Stress poses a great threat for diabetes and heart attack by altering blood sugar levels. This can cause fatigue, impulsive mood changes, and hyperglycemia.
- About 77% of Americans regularly experience physical symptoms caused by stress

Recommended Usage

This list would be helpful to a variety of health-related businesses, such as pharmaceutical companies, medical magazines and publications, healthcare providers, medical device suppliers, and more. Having access to this data adds value to your direct mail and email campaigns.
